

Meeting

Philip Tibom
Hossein Hussain
Daniel Olsson

2016-02-25

1 Contents of this meeting

- Deciding what project to do.
- What technologies to use.
- UML.
- What to do until next meeting.

2 Decided project

Travel Agency, we are aiming for highest grade (VG).

The goal is to offer packaged travels. Flight (Turn and return) + Hotel.

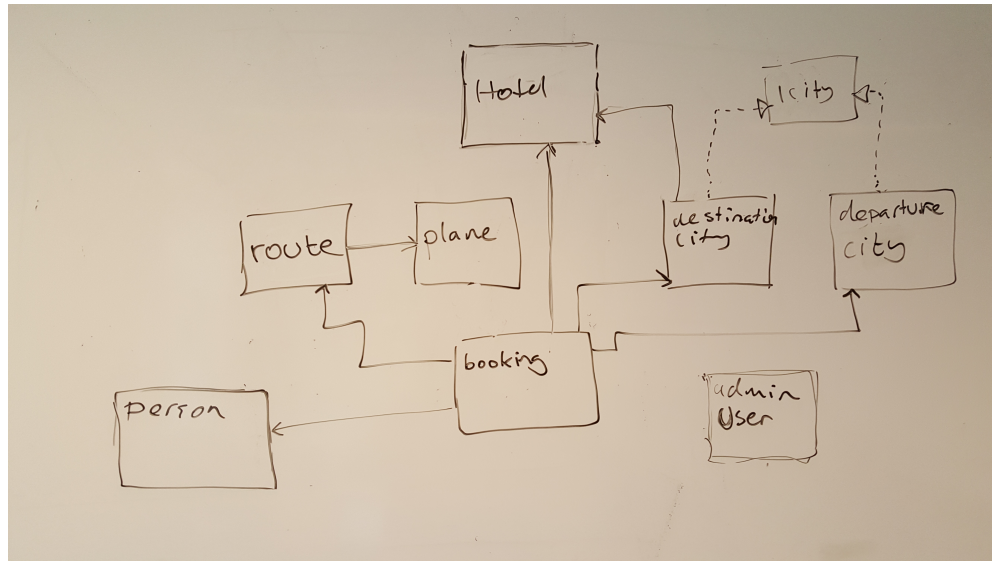

3 Technologies

Here is the technologies that we have decided to use in this project.

- JSF together with PrimeFaces. As this allows us to focus on the features and code design.
- Glassfish as this allows us to implement JAX-RS if needed in the future.
- Database: JavaDB/Derby.
- Source management: Git + github.
- Maven project.
- IDE: Netbeans

4 UML

The final UML will be uploaded to our Git repository in a separate document.

5 Use-cases

We will draw a rough design of how we want the website to look like. And then decide what use-cases that we really need.

The use-cases will be uploaded to the repository.
